REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of features in the independent claims was not found in the prior art as follows: The prior art comprises a processor with and multiple port instruction cache and plural dispatchers that operate independently and fetching and executing instruction streams or program threads that are grouped according to something in common between the streams or threads in the particular group and a queue for dispatch of threads in the group. However, the additional combination of features in combination with the features above as claimed in claim 1, further comprise clusters of instruction streams where each cluster is independent of the other cluster of instruction streams and comprise a dispatcher for each cluster but also wherein each stream in a cluster has its own instruction queue, this combination of features was not found in the prior art. Claim 9 comprises clusters of instruction streams where each cluster is independent of the other cluster of instruction streams and each cluster comprises a dispatcher. Claim 9 also includes the additional feature including that in each cycle fetching instructions from the instruction cache for one of the instruction streams in each of the first and second cluster, this combination was not found in the prior art. Claim 17 comprises plural clusters of instruction threads wherein each cluster comprises fetch stage, plurality of instruction queues, dispatch stage coupled to the instruction queues that queue the threads in the cluster, and execution stage and also wherein the clusters concurrently access the cache, this combination of features was not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
